User Manual - Dynamic Personal Portfolio Website

Overview

This dynamic personal portfolio website is designed to present a profile, including personal information, services, academic background, curriculum vitae (CV), projects, image gallery, and a contact form. The website incorporates several interactive features such as a theme switcher, sortable and filterable academic table, an embedded CV viewer, a project progress tracker, and an image carousel. The interface is responsive and optimized for both desktop and mobile devices.

Getting Started

1. Open index.html in a browser.
2. Use the top navigation bar to jump to different sections of the website, including **Profile, Services, Academics, CV, Projects, Gallery,** and **Contact**.
3. On mobile, tap the menu icon to open the navigation links.

Key Features and How to Use Them

1. Theme Switcher

- **Location:** Top navigation bar (button labeled *Dark Mode* / *Light Mode*).
- **Action:** Click the toggle button to switch between light and dark themes.
- **Note:** The selected theme is saved using browser local storage and is automatically applied on future visits.

2. Academic Table (Sorting and Filtering)

- **Location:** Academic Background section.

Sorting:

- Click on any column header (**Level, School, Qualification, Year**) to sort the table data.
- Clicking the same column again toggles between ascending and descending order.

Searching:

- Use the search input field to find records by school name or qualification.

Filtering:

- Use the dropdown menu to display records from a specific academic level (Matric, College, or University).

3. CV Viewer

- **Location:** Interactive CV Viewer section.
- **Action:** Click the **Open CV** button.
- **Result:** The CV opens inside the page using an embedded viewer.
- **Close:** Click the **Close** button to hide the CV panel.

4. Projects (Progress Tracker)

- **Location:** Projects section.
- **Action:** Scroll down to view the project cards.
- **Note:** Each project card displays a project title, a short description, and a progress bar indicating the completion status of the project. (The projects mentioned are demo data only)

5. Gallery (Carousel)

- **Location:** Gallery section.
- **Action:** Click the **Prev** and **Next** buttons to navigate through the images.
- **Note:** The image caption updates automatically as images change.

6. Contact Form

- **Location:** Contact section.

Steps to use:

1. Enter your full name, email address, and message.
2. Click the **Send Message** button.

Validation Rules:

- The name must be at least two characters long.
- The email must be in a valid format (e.g., name@example.com).
- The message must contain at least ten characters.

Feedback:

- A success or error message is displayed below the form after submission.
